Customisation

All of our PC models can be customised with any processor, memory or hard disk, and all can be added to our All In One and Space-saver cases.

Height Adjustable stands

Monitors

Microsoft Licensing

Imaging

Asset Tagging

Kensington lock points

3rd Generation Intel® Core™ Processors

You can choose your own specification, no matter if it is a one-off, or one of hundreds. Building machines to order means that we can save you money by choosing the best or the most appropriate components to fulfil a specific function or purpose.

Bursar's Choice

The Space Saver has a small 'footprint' on the desk with only one power cable for both the PC & Monitor. With a customisable specification the Space Saver's simple design is easy to maintain & keep clean.

All the technology you need from one trustworthy source

Novatech can provide your school with all the ICT it needs, from interactive whiteboards and wireless infrastructure, to cabling and printer cartridges.

We do:

- EES agreements
- A complete range of our own and other brand name servers
- Networking and wireless infrastructure
- Bespoke Audio Visual solutions
- Projectors
- Learner-response and class management tools
- Installation and on-site repair
- Software Volume Licencing
- Leasing and one-to-one purchasing schemes

Need to make tight budgets go further?

Talk to Novatech education today about our simple and cost-effective leasing options. Leasing can ensure that your school benefits from quality technology with complete peace of mind with comprehensive warranty and support options included.

Servers

The procurement of your server doesn't need to be daunting. Novatech can guide you through the process to ensure that you get the right server built bespoke to your requirements, installed and working properly, on time and on budget.

Powered by Intel® Xeon®

Novatech servers are based on the Intel® Xeon® processor giving you smarter control of the things that matter to your school – improved performance and reduced risk. Upgrading to Intel Xeon-based servers can provide the reliability you require today, while creating the room you need to grow for tomorrow.

Intel® Turbo Boost Technology 2.0

Providing you with even more performance when needed.

Intel® Intelligent Power Technology

Conserves power while delivering advanced power management.

Intel® vPro™ Technology

Maximized, hardware-assisted security and manageability.

Novatech is one of the first manufacturers to include the new 3rd generation Intel® Core™ processors in PCs across its range so that you can work smarter and brighter no matter which machine you choose.

Need a smaller, lighter machine that will work faster and use less power?

That's what the new 3rd generation Intel® Core™ processors will give you and your school - more computational power while using less energy.

Saves money by working faster and more efficiently.

On average 3rd generation means about 20% more processor performance using 20% less power, and power means electricity and that in turn means saving money of course.

What our customers say about us

For nearly twenty five years Novatech has been giving our customers worry free computing. Ensuring that they get exceptional service, products and support is ingrained in everything we do.

St Vincent College

Rob Ackroyd , Network Manager

"Novatech stood out in terms of the advice they gave, competitive pricing and the green technologies they offer. We already had experience of their outstanding customer service from previous projects and they didn't let us down when installing our virtual server. We highly recommend them to other organisations and as testament to this they are an integral part of our 5 year IT plan."

Portchester Community School

Alan Clemmy, Network Manager

"I have been working at Portchester Community School for the past eight years and during that time Novatech has been our main supplier of 'all things computers'. The friendly staff and account managers have given the School quick & excellent service and we have invariably been supplied with quality goods. I always recommend Novatech as the first port of call for all hardware and software items."

Joe Fairbairn, Network Manager, Chatsmore Catholic High School

"Novatech understood our needs very well. Their tailored solution was crucial to the successful implementation of our "one to one" home access scheme. Of the 3 competitors, Novatech were not only the most cost-effective option, they were efficient in service and always readily available in regards to support and assisting in the formulation of the project concept. We regularly endorse and refer Novatech to our Catholic partner schools based within our diocese and schools in our local LEA. We find them cost effective, reliable, efficient and helpful."
